*Gentlemen:*

*I just had to write and tell you about your product that I recently used. My home is near a pond, and I have 2 sump pumps. The other day, the power went out from a bad storm, the sump pumps did not work, and I got over 1 foot of water in my basement - a basement of 3,000 square feet.*

*The next day, I rented an auxiliary pump and got the water out. Of course, soon after that, there was an odor of mold and mildew. Although the basement is unfinished, there were many stored items that became wet.*

*I had heard about your product and tried it. I opened 4 canisters of your product and placed them throughout the basement. I brought in 2 fans to help dry out the area and help your product work.*

*To my great surprise, within 3 days, you could barely notice the odor, and after 7 days, there was no discernable odor. I have left your product down there and will refresh after it totally evaporates. It is amazing to me that there is no odor or perfume from your product. It's as though the odor is eliminated not covered over!*

*I'm especially happy that your product is safe around my 2 dogs and cat - even though I don't let them down there, they sometimes want to explore.*

*I am very pleased with your product and I plan to tell my friends the results of my use of your product.*

*Sincerely,*

*Carl E. Peterson*
