To Whom It May Concern:

I have been using this product in my home for years!

It was originally labeled "Nature's Appeal," and was only available for commercial use.

Our home is a 60 year old split-level and lacks a decent airflow pattern. During periods of nice weather, we tend to leave our windows closed and run the air conditioning because of allergy problems.

This product not only eliminates musty smells and other odors, but leaves our home smelling fresh without the heavy smell of perfume or fragrance.

I always knew it worked well, but never realized how well until my college-aged son asked me if he could take several away to school with him!

I highly recommend ordering this stuff by the case!!! I enjoy using them in multiple rooms on different levels of our home, as well as the air flow compartment of my HVAC unit.

I am very pleased to see this product has been relabeled as "Attack Stink" and that it is now available for retail purchase at www.attackstink.com!

Sincerely,

Kathy Thomas
